DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13, 15-17, 19-31, 33-35, 37-40 and 47-52 are rejected under 35 U.S.C. 102(b) as being anticipated by Tang et al. (4,920,203).

Tang et al. disclose the claimed invention including a resorbable, implantable biopolymer fixation device that can be fastened to tissue (see, e.g., Summary of the Invention; col. 7, lines 24-43; col. 8, line 65 - col. 9, line 2; col. 20, lines 41-62; col. 37, lines 67 and 68; col. 38, lines 9 and 10). The device is made of one or more layers of a porous material and can comprise an additional material in the form of various fillers and additives and active agents (id.). The device is at least capable of exhibiting the claimed properties.

Response to Arguments

Applicant's arguments filed 30 March 2009 have been considered but are not persuasive.

The device of Tang comprises structure wherein a bending force necessarily at least partially collapses (i.e., at least deforms vis-à-vis an original state) a portion of the

Art Unit: 3733

pores to form a radius curve when bent. In addition, as noted by Applicant, when a bending force such as a surgical tool or a surgeon's hands are removed, the radius curve is maintained (e.g., as by sutures). The device is also at least inherently capable of being attached to tissue by virtually any means known in the art, including the means referenced in the rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
